<b>5</b>	<b>Deaths</b>	<b>3</b>

## Testing

Testing is where we do a test to see who has coronavirus. Some people are tested more than once.

There were **1,019,739** tests reported on 21 June 2021. This shows an increase of **7.6%** compared to the previous 7 days.

Between 15 June 2021 and 21 June 2021, there have been **6,465,374** tests.

## Cases

A confirmed case is someone who has tested positive for coronavirus.

**11,625** new people had a confirmed positive test result reported on 22 June 2021.

Between 16 June 2021 and 22 June 2021, **72,401** people had a confirmed positive test result. This shows an increase of **34.8%** compared to the previous 7 days.

## Vaccinations

Vaccines are currently given in 2 doses, at least 21 days apart.

**43,148,843** people had been given a first dose by the end of 21 June 2021.

**31,489,240** people had been given a second dose by the end of 21 June 2021.

## Healthcare

Some people with coronavirus have to go into hospital.

**225** people with coronavirus went into hospital on 16 June 2021.

Between 10 June 2021 and 16 June 2021, **1,446** went into hospital with coronavirus. This shows an increase of **34.9%** compared to the previous 7 days.

There were **1,378** patients in hospital with coronavirus on 20 June 2021.

Some people in the hospital need to use a special device called a mechanical ventilator to help them breathe.

There were **227** coronavirus patients in hospital beds with a mechanical ventilator on 21 June 2021.

## Deaths

There were **27** deaths within 28 days of a positive test for coronavirus reported on 22 June 2021.

Between 16 June 2021 and 22 June 2021, there have been **91** deaths within 28 days of a positive coronavirus test. This shows an increase of **44.4%** compared to the previous 7 days.
